Work experience

Full Stack Engineer — TalentTribe Asia Singapore

From February 2020 to November 2020

TalentTribe is a career platform targetting millenials. I am responsible for creating components, maintaining existing products, new features developments, and killing bugs.

Technogies used include AWS, NextJs, ExpressJs, Firestore, Algolia, and Nginx. I also setup a Wordpress application using AWS with its own SSL.

Sofware Developer — Webimp, Pte. Ltd. Singapore

From March 2019 to February 2020

I was working as a web developer using PHP with CodeIgniter Framework. I also use jQuery to manage Front End behaviours, to consume APIs and map data on the Front End side. I also translate business processes into
software logic.

WebImp has been awarded as the best company to work for 2019 in Singapore by the Singapore Computer Society.

Project Manager — Tanjungpinang City Government Tanjungpinang

From November 2018 to February 2019

CMS Tanjungpinang is a Dynamic portal for the departments in Tanjungpinang to broadcast their news. It is designed to be used
dynamically, easy, and intuitive.

I manage requirements, lead a solid team of developers, and deliver quality product to the client.

The application was built using Node.js, ReactJS, and MySQL as database.

Project Manager — Tanjungpinang City Government Tanjungpinang

From January 2018 to May 2018

I work as a Project Manager for the Statistics Open Data Project in Tanjungpinang for the government.

I ensure that the product complies with the client's requirements and to
satisfy any complaints or changes within the project time-frame.

I also do some hands on coding as the Back End developer for the project.

The project was built using NodeJs and ReactJs with MySQL database.

Full Stack Developer — Freelance Work Tanjungpinang

From May 2015 to February 2019

I build small to mid-scale ERPs for some confidential clients using technologies ranging from LAMP to MEVN stacks. Manage and communicate directly with clients, also manage a small team of 2-5 people for some
complex projects.

Technologies include: Node.js (Express.js), ReactJS, VueJs, PHP (CodeIgniter, Native, Laravel) with SQL, PostgreSQL,
and MongoDB as database.
